

product name	Production location
Handmade Touraine	Hedikhuizen

The bricks are mainly produced from alluvial clays from the sedimentary region of the river Meuse. The river eroded the Ardennes rock formations and carried along the eroded materials. In the flooded region of the river's lower course, these materials were eventually deposited as sediments. Judicious mixing of the clay deposits produces just the right kind of base material for the production of hand form bricks.

	Colour	
nicoloured purple red		
	Format	
Moulding met	hod Hand form	
WF: 209 x 101 x 51 mm	Between batches	the average size and color may slightly differ.
Essential Cha	aracteristics - EN771	l-1
	CE	0620-CPR-97880
Dimensions: tolerance category	T2	
Dimensions: range category	R1	
Active soluble salt	S2	
Average compressive strength	NPD	Tested to the bed face
Normalised compressive strength	>= 10 N/mm²	Tested to the bed face
Dimensional stability	NPD	
Bond Strength general	0,15 N/mm²	Value according EN998-2 Annex C
Adhesive strength (mortar)	0,30 N/mm²	Value according EN998-2 Annex C
Reaction to fire	A1	Category
Water absorption	<= 15% m/md	
Water vapour permeability	5/10	
Net dry density	1800 kg/m³ (D1)	
Gross dry density	1690 kg/m³ (D1)	
Equivalent thermal conductivity	<=0,49 W/m.K	Value according EN1745, Annex A 50%
Freeze/thaw resistance	F2	
Dangerous substances	NL-BSB	According Annex ZA.3
Other	Characteristics	
Initial cate of contact because in Many and all Bride	4.0. 0.01/2	. Value asserting FN774 4-2044 F 2.0

Other Characteristics			
Initial rate of water absorption - Non-coated Brick	4,0 - 8,0 kg/m².min (IW4)	Value according EN771-1:2011 - 5.3.8	
Initial rate of water absorption (kg/m².min) - Coated Brick*	NPD	Value according EN771-1:2011 - 5.3.8	
Eq. Thermal Property 10, dry mass (90/90)	NPD		
Eq. Thermal Property 10, dry mass (lambda Ui)	NPD		
Eq. Thermal Property 10, dry mass (lambda Ue)	NPD		

Cutting

Storage & handling	

- Store packs on a clean surface and cover them

- Process from multiple packs at the same time - Follow the Vandersanden processing guidelines

Cutting with power tools may generate dust. This dust may contain silica or quartz particulate which may constitute a hazard. Persons undertaking work of this nature are advised to user dust mosts (ESP2) to wear dust masks (FFP3).

*All our Coated bricks are only coated on the facing sides. Coated products are specially labeled and recognisable with a "C" logo on the top left-hand side of the packaging. Always check if using coated or non-coated bricks. Match the mortar to the specified initial water absorption.

product name	Production location	
Handmade Touraine	Spijk	

The bricks are mainly produced from alluvial clays from the sedimentary region of the river Meuse. The river eroded the Ardennes rock formations and carried along the eroded materials. In the flooded region of the river's lower course, these materials were eventually deposited as sediments. Judicious mixing of the clay deposits produces just the right kind of base material for the production of hand form bricks.
